

# How to make squishy soap!

## Ingredients:

- Half a cup of cornflour
- 4 tbsp liquid soap (washing up liquid can be used)
- 4tsp of cooking oil (vegetable or sunflower)
- 1tsp food colouring (optional)
- 2/3 drops of essential oil (optional)

## Method:

- **Step 1:** Put the cornflour in a bowl with the liquid soap and mix well with a spoon.
- **Step 2:** In the same bowl mix in 4 tsp of oil along with any food colouring and/or essential oil.
- **Step 3:** Once it's all mixed well start to use your hands to mould it together into a ball. If the texture is too crumbly you can try adding more oil and liquid soap. Please be careful when doing this and only add in small amounts at a time. Once the mixture is formed into a ball knead it in your hand to encourage binding.
- **Step 4:** Enjoy playing it with! Make some shapes, separate it or make several characters. Just have some fun.
- **Step 5:** Break a bit off or use the whole piece to wash your hands with- just like you would normal soap. Dry your hands on a towel afterwards and keep the soap in an airtight container.
